

UNIVERSITY  
OF WARSAW

FACULTY OF  
ECONOMIC SCIENCES

Warsaw, March 20th, 2026

**Dear Members of the Academic Community,**

On behalf of the Faculty of Economic Sciences at the University of Warsaw, I am pleased to invite you to participate in the **Warsaw Econometric Challenge (WEC)**, which will take place on **25 April 2026**.

Organised by the Faculty of Economic Sciences, the Warsaw Econometric Challenge is an **international econometrics hackathon** that brings together talented undergraduate and graduate students interested in data analysis, econometric methods, and evidence-based research. Working in teams, participants will analyse a real-world case developed in collaboration with leading companies, and prepare a short research paper addressing a practical economic problem.

The event aims to foster analytical thinking, collaboration, and the practical application of quantitative methods in economics. It also provides an excellent opportunity for students to engage with peers from different universities and academic backgrounds in a stimulating and intellectually challenging environment.

I warmly encourage students, student research groups, and academic societies to form teams and take part in this unique initiative of the Faculty of Economic Sciences. Further information and registration details are available at: <https://wec.wne.uw.edu.pl/>

I look forward to welcoming participants to the University of Warsaw for this exciting event.

Prof. Gabriela Grotkowska

Dean of the Faculty of Economic Sciences  
University of Warsaw
